Description

Parallel programmer for 5.5V high flash memory of series 49 and 39 series and Firmware Hub chips

The PLCC32 socket is available as well as DIP32. TSOP32 chips can be programmed using an adapter (TSOP32 to DIP32 adapter will be send with a programmer). Functions: manufacturer and chip ID detection, reading, saving in a bin file, erasure, writing back from file, verification.

Before buying, look

attentively through the supported chips list, please.

If you need to program a chip that is not present in the list, look among what our products for another programmer or inform us, in order we could add it in next version.

The link to download driver, software (Windows only) and pdf manual will be send along with the programmer.
